

AMIR REYNOLDS

Computer Engineer

areynolds.engr@gmail.com | 404-798-1154 | [linkedin.com/in/amir-reynolds](https://www.linkedin.com/in/amir-reynolds) | areynolds-engr.github.io/portfolio

OBJECTIVE

Computer Engineering student seeking embedded systems, firmware, hardware, and software engineering roles, with hands-on experience in C/C++, Python, VHDL, microcontrollers, FPGA development, digital design, circuit analysis, and hardware-software integration. Focused on designing, testing, and debugging reliable computing systems.

EDUCATION

Bachelor of Science in Computer Engineering, Georgia Southern University — Statesboro, GA | 2026

Relevant Coursework: Microcontrollers, Microelectronics, Advanced Engineering Analysis, Computer Systems Design, Signal Processing, Operating Systems, Network Architecture & Protocols, Cybersecurity, Database Systems, Machine Learning

Organizations: Tech Developers Association, Habitat for Humanity, IEEE, National Society of Black Engineers (NSBE)

PROFESSIONAL EXPERIENCE

Technical Operations Engineer — Savannah, GA

H&R Block | Aug 2026 - Present

- Manage technical operations across Savannah-area offices, diagnosing hardware, software, network, and system-level issues in Windows environments.
- Configure, test, deploy, and support computers, peripherals, applications, and user systems while performing root-cause analysis to reduce downtime.

Founder / Web Developer

Reynolds Web Services | 2026 - Present

- Operate a web services business delivering custom websites, hosting, domain setup, SEO configuration, and technical support for local businesses.
- Manage client projects from requirements gathering and development through deployment, performance optimization, maintenance, and post-launch support.

Technology Assistant — Statesboro, GA

Georgia Southern University | Mar 2022 - Oct 2023

- Diagnosed and resolved hardware, software, operating system, and peripheral issues across desktops, laptops, and university technology systems.

Data Analyst Intern — Atlanta, GA

Lovern Logistics | Apr 2023 - Aug 2023

- Analyzed large logistics datasets to generate insights that improved operational efficiency, cost reduction, and customer satisfaction.
- Cleaned, organized, and interpreted data using AWS and data-analysis tools to support performance tracking, reporting, and data-driven decision-making.

SELECTED TECHNICAL PROJECTS

- **Servo Motor Detection System:** Developed an Arduino-based detection system using servo-controlled ultrasonic sensing, LCD interfacing, and proximity alerts for real-time object detection.
- **FPGA Stopwatch System:** Designed and tested a VHDL-based stopwatch on a Cyclone V FPGA with clock division, seven-segment display control, user inputs, and hardware debugging.
- **Digital Picture Frame:** Built a digital picture frame integrating hardware setup, software configuration, display control, testing, and troubleshooting.
- **Library Management System:** Built a Python/Flask/MySQL backend using SQL, REST-style routing, and relational database design.

TECHNICAL SKILLS

- **Programming & Embedded:** C/C++, Python, VHDL, Java, SQL, Embedded Systems, Microcontrollers, Arduino, ESP32, Raspberry Pi, FPGA
- **Hardware & Digital Design:** Digital Logic, Computer Architecture, Hardware-Software Integration, GPIO, ADC, UART, SPI, I2C, Circuit Analysis, Microelectronics, Signal Processing
- **Engineering Tools & Systems:** Intel Quartus Prime, MATLAB, LTspice, Multisim, Git/GitHub, Linux, Wireshark, VS Code, Oscilloscope, Function Generator

CERTIFICATIONS

- AWS Certified Machine Learning Engineer - Associate
- Learn Python Programming: Beginner to Master - Udemy
- The Complete Java Development Bootcamp - Udemy
- Fundamentals of Effective Team Management - Coursera
