

AMIR REYNOLDS

Computer Engineer

areynolds.engr@gmail.com | 404-798-1154 | [linkedin.com/in/amir-reynolds](https://www.linkedin.com/in/amir-reynolds) | areynolds-engr.github.io/portfolio

OBJECTIVE

Computer Engineering student seeking machine learning, AI, and embedded AI engineering roles, bringing experience in Python, AWS, data analysis, embedded systems, and hardware-software integration. Focused on building intelligent systems that connect machine learning with real-world computing and resource-constrained hardware.

EDUCATION

Bachelor of Science in Computer Engineering, Georgia Southern University — Statesboro, GA | 2026

Relevant Coursework: Microcontrollers, Microelectronics, Machine Learning, Advanced Engineering Analysis, Computer Systems Design, Database Systems, Signal Processing, Operating Systems, Cybersecurity, Network Architecture & Protocols

Organizations: Tech Developers Association, Habitat for Humanity, IEEE, National Society of Black Engineers (NSBE)

PROFESSIONAL EXPERIENCE

Technical Operations Engineer — Savannah, GA

H&R Block | Aug 2026 - Present

- Manage technical operations across Savannah-area offices, diagnosing hardware, software, network, and system-level issues in Windows environments.
- Configure, test, deploy, and support computers, peripherals, applications, and user systems while performing root-cause analysis to reduce downtime.

Founder / Web Developer

Reynolds Web Services | 2026 - Present

- Operate a web services business delivering custom websites, hosting, domain setup, SEO configuration, and technical support for local businesses.
- Manage client projects from requirements gathering and development through deployment, performance optimization, maintenance, and post-launch support.

Technology Assistant — Statesboro, GA

Georgia Southern University | Mar 2022 - Oct 2023

- Diagnosed and resolved hardware, software, operating system, and peripheral issues across desktops, laptops, and university technology systems.

Data Analyst Intern — Atlanta, GA

Lovern Logistics | Apr 2023 - Aug 2023

- Analyzed large logistics datasets to generate insights that improved operational efficiency, cost reduction, and customer satisfaction.
- Cleaned, organized, and interpreted data using AWS and data-analysis tools to support performance tracking, reporting, and data-driven decision-making.

SELECTED TECHNICAL PROJECTS

Self-directed portfolio showcasing hands-on engineering, software development, and technical problem solving.

- **Plant Health Monitoring System:** Developed a machine learning-based system that analyzes plant data to monitor health conditions and support data-driven assessment.
- **Digital Picture Frame:** Designed and built a digital picture frame for automated image display, integrating hardware setup, software configuration, display control, testing, and troubleshooting.
- **Library Management System:** Built a Flask/MySQL backend for managing library records and database operations using Python, SQL, REST-style routing, and relational database design.
- **Microcontroller Control Systems:** Developed Arduino-based sensor and LED control systems using ADC inputs, GPIO, serial communication, real-time user control, testing, and debugging.

TECHNICAL SKILLS

- **AI & Machine Learning:** Supervised & Unsupervised Learning, Deep Learning, Model Evaluation, Feature Engineering, NLP, RAG, scikit-learn, TensorFlow
- **Programming & Data:** Python, SQL, Java, C/C++, NumPy, pandas, Data Preprocessing, Algorithms, Data Structures, REST APIs
- **Platforms & Tools:** AWS, Docker, Git/GitHub, Linux, Flask, Jupyter Notebook, VS Code, PostgreSQL

CERTIFICATIONS

- AWS Certified Machine Learning Engineer - Associate
- Learn Python Programming: Beginner to Master - Udemy
- The Complete Java Development Bootcamp - Udemy
- Fundamentals of Effective Team Management - Coursera
