

AMIR REYNOLDS

Computer Engineer | Software Engineering

areynolds.engr@gmail.com | 404-798-1154 | [linkedin.com/in/amir-reynolds](https://www.linkedin.com/in/amir-reynolds) | areynolds-engr.github.io/portfolio

OBJECTIVE

Computer Engineering student seeking software engineering roles, bringing experience in Python, Java, C/C++, JavaScript, SQL, backend development, databases, REST APIs, AWS, and technical systems. Strong foundation in object-oriented programming, algorithms, data structures, debugging, and building reliable hardware-software solutions.

EDUCATION

Bachelor of Science in Computer Engineering, Georgia Southern University — Statesboro, GA | 2026

Relevant Coursework: Database Systems, Operating Systems, Computer Systems Design, Machine Learning, Advanced Engineering Analysis, Cybersecurity, Network Architecture & Protocols, Microcontrollers

Organizations: Tech Developers Association, Habitat for Humanity, IEEE, National Society of Black Engineers (NSBE)

PROFESSIONAL EXPERIENCE

Technical Operations Engineer — Savannah, GA

H&R Block | Aug 2026 - Present

- Manage technical operations across Savannah-area offices, diagnosing software, hardware, network, and Windows system issues to maintain reliable business operations.
- Configure, test, deploy, and support applications and user systems while performing root-cause analysis and technical troubleshooting.

Founder / Web Developer

Reynolds Web Services | 2026 - Present

- Design, develop, deploy, and maintain responsive websites for local businesses, including hosting, domains, SEO configuration, and ongoing technical support.
- Manage software projects from requirements gathering and development through testing, deployment, performance optimization, maintenance, and post-launch support.

Technology Assistant — Statesboro, GA

Georgia Southern University | Mar 2022 - Oct 2023

- Diagnosed and resolved operating system, application, hardware, and peripheral issues across university computer systems.

Data Analyst Intern — Atlanta, GA

Lovern Logistics | Apr 2023 - Aug 2023

- Analyzed and processed large logistics datasets using AWS and data-analysis tools to support reporting, performance tracking, and data-driven decisions.

SELECTED TECHNICAL PROJECTS

Self-directed portfolio showcasing software development, data-driven applications, and hands-on technical problem solving.

- **Library Management System:** Built a Python/Flask/MySQL backend for library records using SQL, REST-style routing, CRUD operations, and relational database design.
- **Plant Health Monitoring System:** Developed a machine learning-based application that analyzes plant data to monitor health conditions and support data-driven assessment.
- **Digital Picture Frame:** Built a digital display system integrating software configuration, automated image presentation, display control, testing, and troubleshooting.
- **Servo Motor Detection System:** Developed an Arduino-based real-time detection system integrating sensor input, servo control, display output, and embedded program logic.

TECHNICAL SKILLS

- **Programming & Software:** Python, Java, C/C++, JavaScript, SQL, HTML/CSS, Flask, Node.js, JSON, REST APIs, Object-Oriented Programming
- **Computer Science & Data:** Algorithms, Data Structures, Database Design, MySQL, PostgreSQL, NumPy, pandas, Data Processing, Debugging
- **Platforms & Dev Tools:** AWS, Docker, Git/GitHub, Linux/Unix, VS Code, IntelliJ, Jupyter Notebook, Wireshark

CERTIFICATIONS

- AWS Certified Machine Learning Engineer - Associate
- The Complete Java Development Bootcamp - Udemy
- Learn Python Programming: Beginner to Master - Udemy
- Fundamentals of Effective Team Management - Coursera
